

BEST Scoreboard

Android App

Downloading the App

You can download the app from the Android Marketplace on your phone or through Google Marketplace. The Google link <https://market.android.com/details?id=com.omhsbestrobotics.scoreboard> When installing from the Android Marketplace, search for “BEST Scoreboard”. The app appears a little way down the list

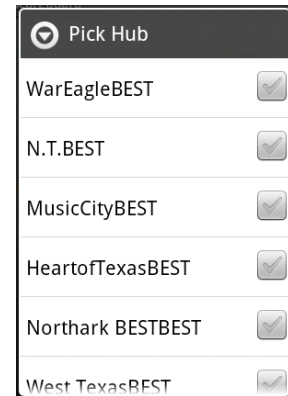

The Home View

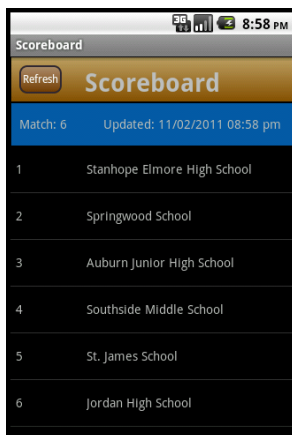

From the home view you can select your primary hub. Your primary hub is the one for which you want to view real-time live scoring and schedules.

1. Touch “Pick Hub”
2. A list of active hubs will appear
3. Touch the hub’s name to select

If you have picked a hub recently, you will see a “loading” message while the latest list of active hubs is downloaded.

The Scoreboard View

From the scoreboard view you can view rankings and detailed scoring.

The scoreboard will automatically refresh every minute (if you have automatic refresh on in the preferences – see later). You can manually refresh it by touching the refresh button or shaking your device.

To view more detailed scoring for a team, touch the team name.

BEST Scoreboard

Android App

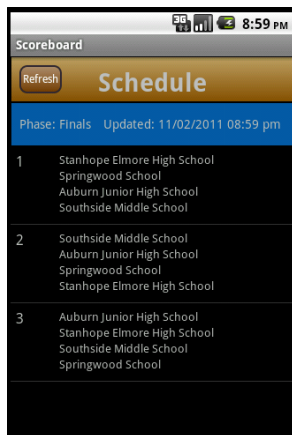

The Scoreboard Detail View

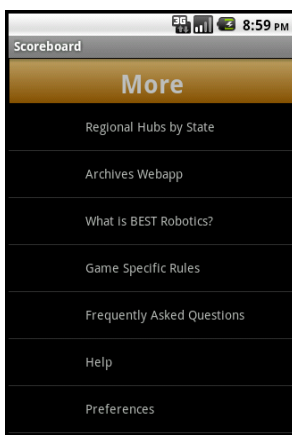

From the scoreboard detail view you can view current match, rankings as well as, scores, bonuses, and cumulative scoring. The cumulative score may not be available at the end of rounds. These values do not automatically update. To update, touch “Scoreboard” to return to the scoreboard view and then touch your team to return to the team view.

The Schedule View

From the schedule view you can view the current round schedule. The schedule view will automatically update every 2 minutes (if enabled in preference) or you can manually refresh it by touching the refresh button.

The More View

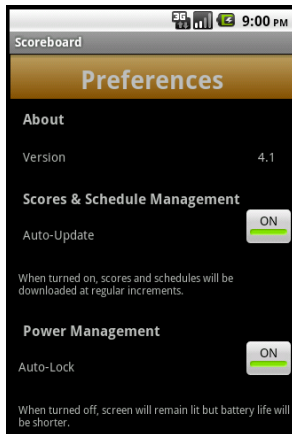

From the more view you can:

- Search and locate regional hubs, competition dates and times
- Learn more about BEST
- View game specific rules and FAQs
- View local help documentation
- Set your scoring, scheduling, and power management preferences
- Share feedback with us

If you are providing feedback, please note the version of the app you are running. This can be found on the preference view. If you do not have a preference view, you are running an out of date version.

The Preference View

From the preference view you can change your scoring, scheduling and power management settings. Each of these settings is saved between sessions.

Scoring and Schedule Management

- Turn ON to receive regular updates on scores and schedules
- Turn OFF to disable regular updates and use the manually button

Note: Regular updates do consume more data than manual ones. Please keep this in mind if you are running a minimal G3 data plan.

Power Management (*BETA – may not work on all devices at this time*)

- Turn ON to allow your phone to dim and lock
- Turn OFF to allow your phone to remain lit and unlocked

Note: Turning Auto-Lock OFF will consume more battery life than leaving it turned ON.
