PathAssess™

Only \$12.95
(for 2 time use)

Only from JETS

Created from two validated and tested theories of career development and choice:

1. The Holland Theory of Vocational Interest
2. Lent's Social Cognitive Career Theory

Provides each student with their personal Holland Interest Code and compared to the unique Holland codes of 55 college-level engineering majors.

Results in a customized student profile relating their current interests to the types of engineering careers they may wish to pursue.
