

This is a Robot.

(Some Assembly Required)

On September 13th teams from 32 area high schools will receive a box of parts and a challenge: within six weeks, transform these parts into a radio-controlled robot capable of completing a task while competing against the other teams. The teams rely on the guidance and experience of technical professionals like you. As a mentor, you spend a few hours per week helping teams through the engineering process. For more information contact:

SA BEST • 5601 Bandera Road, PMB 335 • San Antonio, TX 78238
