

Mobile ScoreBoard for iPhone or Android

Watch the Promo Video At

http://www.bestinc.org/BRI_Apps/App-BEST-LowRes-Promo.mov

Available to everyone this year is a new online ScoreBoard app available for iPhone or Android mobile devices. The app lets you keep up with the scores from your favorite hub or teams as they happen. Any number of teams can be “watched” from any hub participating. And it’s free.

The Android version is available through the Marketplace (preferred method for download/install) on any android device (phone or tablet) or on the web at <https://market.android.com/details?id=com.omhsbestrobotics.scoreboard>

The iPhone version is available through the App Store on the device (preferred method for download/install) or via the web link <http://itunes.apple.com/us/app/best-scoreboard/id392464952?mt=8>

The best way to download either is for people to search their app store (on their phone) for "BEST Scoreboard". As more people download it, it should move up in the list. Right now its #1 on the iPhone store and about #12 on the Android store.

A web version is available at the http://www.bestinc.org/BRI_Apps for anyone on a tablet, computer, or unsupported web-enabled phone.

Thanks to Stephen Cauthen from Blazer BEST for development of this app.
